## SUMMARY

When I saw the magic of Photoshop for the first time from then, I was inspired to do creative work on computers. Then I slowly began to master the works of Photoshop. And then I used Photoshop. There were some extra features. So I tried learn anything more advanced level. Then I edit the first time video in Windows Video Editor. Then I found out more about video editing software. Then I gradually became an expert in video editing. I learned web development and first created a website and this was the beginning of my web development. Then I came to this stage today to create more websites.
